INTRODUCTION.

Husain Ali Saleh is a Web Media graduate from Bahrain Polytechnic. He possesses relevant experience in several multimedia projects, such as graphic design, videography, web design, and marketing. He is skilled in creating visually engaging and user-focused digital content across multiple platforms.

Given Husain's relevant experience, he aspires to be at the top of his field in Design, as it is his main strength. He enjoys designing and designing E-commerce solutions, as he plans to have his own E-Commerce store in the future. He finds branding and graphic design appealing to him. He believes that the best way to master any craft is to constantly do it. For instance, your second time designing a logo would truly go much smoother than the first one, because you have gained experience, learned from your mistakes and willing to implement your new-found knowledge.

SERVICES PROVIDED

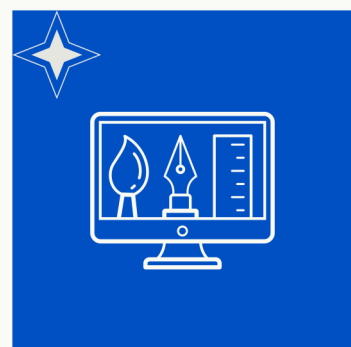

The following contains the list of services Mr.Husain has mastered and ready to deliver a unique experience for his clients.

UI/UX Design

Branding

Graphic Design

Web Design

Motion Graphics

Filmography

FAMILIAR SOFTWARE

The following contains the softwares Mr.Husain has mastered to a far extent to be able to deliver a unique experience for his clients.

Adobe Illustrator

Adobe Premiere Pro

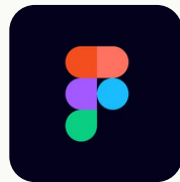

Adobe Photoshop

Adobe InDesign

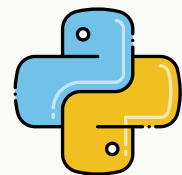

Adobe After Effects

Figma

Canva

Python

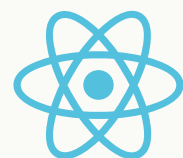

HTML5

CSS3

Javascript

React.js

MY TOP PROJECTS

Project 1 - Ctrl Z platform

I was blessed with the opportunity of working with a start-up team to build a freelancing platform in collaboration with Alsalam Bank and Bahrain Polytechnic, with the goal of helping our students gain extra income and experience.

Me and my colleague where in charge of the market research, sketches, Illustrator Wireframes and interactive prototypes of the project. Find the link to the work [here](#).

Project 2 - Website for 818 media

818 media had an old, out-dated website. So I decided to take the initiative of re-branding their website and coding it as part of my senior project. I met with the client and we discussed his requirements and how can we make the best out of this project. I created a Sitemap diagram, created wireframes using Illustrator, prototypes using Figma, and coded the website using HTML, CSS, and JavaScript in Visual Studio. Find the link to the project [here](#).

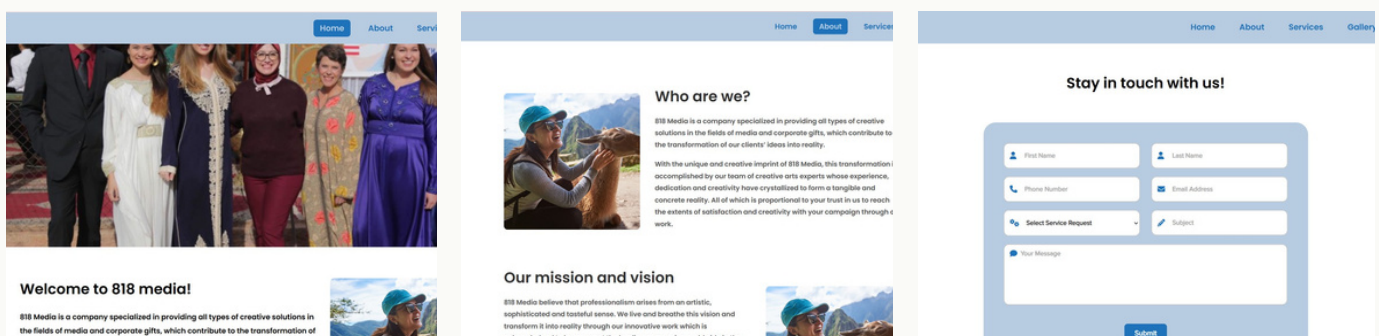

Figure 3: 818 media's site after re-designing.

Project 3 – Jewellery Arabia 2024

Part of my senior project, I registered to take part of the media press team in the Jewellery Arabia exhibition that took place in Sakhir from 26–30 November 2024. I used my Nikon D3400 camera to take footage and photos, including booths and interviews with business owners and visitors to be included in a 5 minute final video to be uploaded on my YouTube channel, find the link [here](#).

- Wireless Microphones were used for interviews.
- Adobe Premiere Pro for editing.
- Adobe After Effects for logo animation & ending credits.
- Adobe Podcast for voice cleaning and noise removal.

Project 4 – Presenter AD motion graphics

Filmed a presenter Ad, where I promoted the general assembly program part of a university project. The project aimed to talk about the benefits of the program, encouraging university students and fresh graduates to take part of it. The script and storyboard was written by me, and the green screen and cameras were provided by the instructors. Adobe Premiere Pro was used for the editing and subtitles, Adobe Audition was used for Audio Cleaning and enhancement, and Adobe After Effects was used for the motion graphics. The motion graphics were downloaded as PNG images from Canva and Vecteezy. Find the videos [here](#).

Project 5 - Animated UI App

During my senior project, I took the initiative of Re-designing the UI for Bahrain Bus application, since the UI was old and outdated. I managed to create the mockups and design the elements using Adobe Illustrator and animate them using After Effects.

Research was conducted to better understand the brand identity for my to better cater design for their needs. The process was more time-consuming than difficult. Find the link to the project [here](#).

Project 6 - BRNO logo re-design

This was my first experience designing a logo, the client was **@firstlady.brno.bh**. It was a challenging experience due to the communication with the client, as he was mostly busy and could not discuss the changes.

This experience gave me a strong insight in terms of branding, conducting relevant research meetings, and good-case practices when it comes to proper communication with the client, such as booking review meetings.

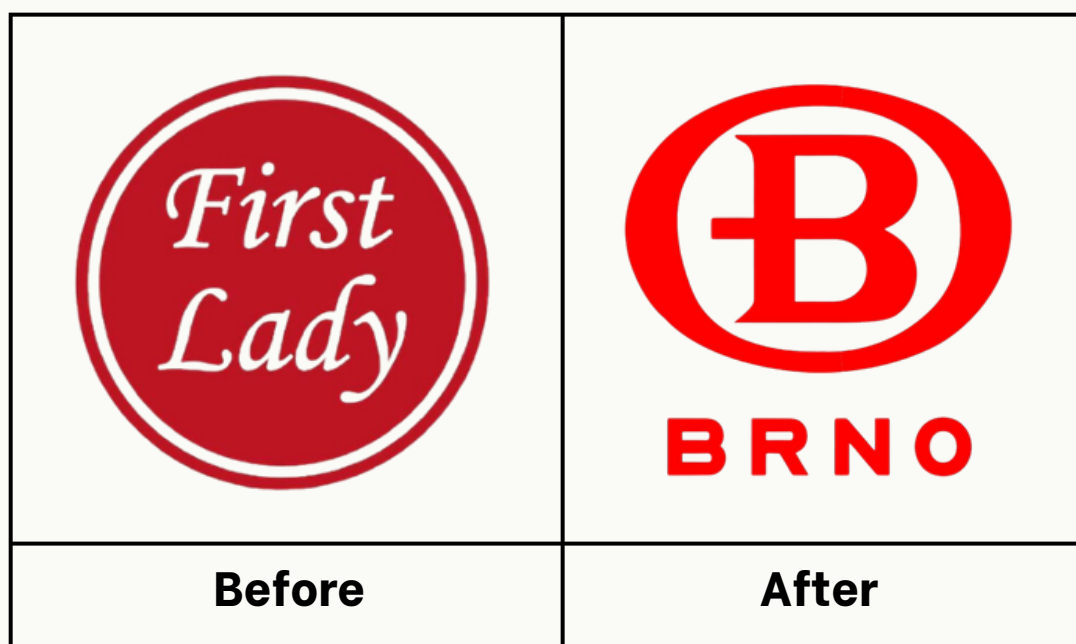

Figure 7: A logo transformation I did for “BRNO”.

Project 7 - LC Tylos content creation

During 2022, I was a member in a non-profit organization called AIESEC in Bahrain, and part of my job description was creating content for Instagram through Canva. I consider this experience to be the kick-start of my journey as it has taught me a lot in terms of graphic design elements, such as balance, alignment, emphasis, typography, etc. Find the link to the Instagram account [here](#).

Project 8 – Dar Altawawish Re-branding

Dar Altawawish is a gemstone and jewelry shop in Manama, Bahrain. Since their logo and branding was outdated, they requested a re-branding and a logo-redesign. This included a brand new logo, color scheme, typography, and office items. They also requested work for their social media profile [@dar.altawawish](https://www.instagram.com/dar.altawawish).

This experience gave me a strong insight in terms of looking for good inspiration, conveying the clients' message, including sales and negotiation. The logo and branding material are in the process of getting printed and changed at the time of writing this. Find the link of the work [here](#).

Figure 9: A logo transformation I did for “Dar Altawawish”.

Figure 10 below showcases the work done for [@dar.altawawish](https://www.instagram.com/dar.altawawish) instagram page. All posts are designed and uploaded by myself. The feed has been carefully planned to fit a tile pattern layout matching the business' color scheme.

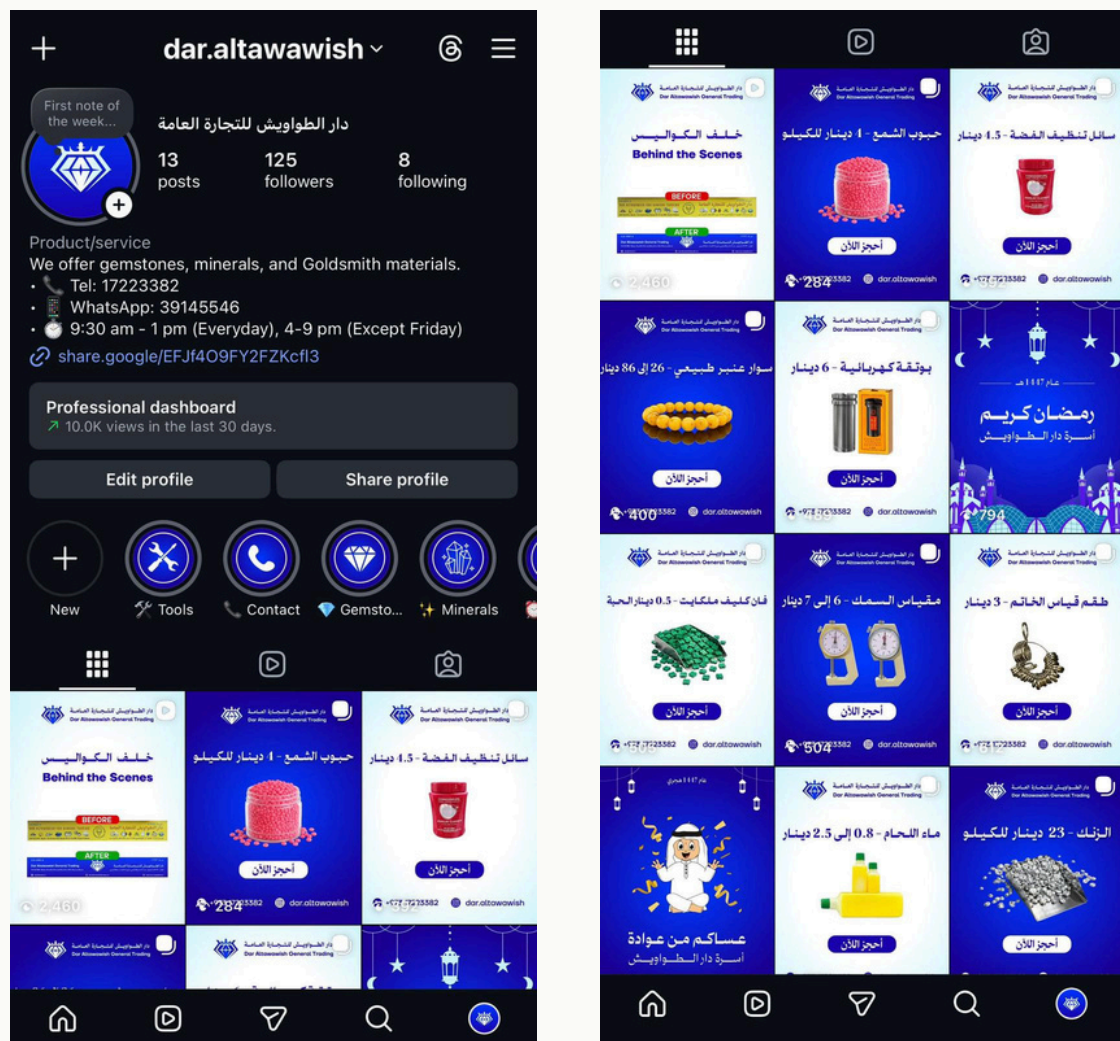

Figure 10: Instagram feed for “Dar Altawawish”.

Project 9 – Dar Altawawish E-commerce Website

Dar Altawawish needed an e-commerce website with the goal of increasing customer reach and supporting their business expansion. The main features included:

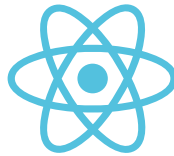

- UI Design that reflects the business' brand guidelines and identity.
- Product display that shows images, price and description of the business' main products.
- Sorting methods for products according to price, alphabet, and time added.
- Functional cart and checkout pages that calculate total amount based on price and quantity.
- Responsive design compatible with Desktop, Tablet, and Mobile.
- Contact form that automatically sends response to the business email.
- Direct links to the business' social media and communication.
- A custom domain bought specifically for the business supported by GitHub, allowing the website to be updated directly once the user pushes the changes to the GitHub platform.

The website was created using the following technologies shown in **Figure 11** below. Find the website link [here](#).

GitHub

React.js

Visual Studio

JSX

Mongo DB

Vercel

Codex

Adobe Photoshop

Adobe Illustrator
